PROFESSIONAL SUMMARY

Computer Science Engineering student (VTU) with hands-on experience in AWS cloud architecture, DevOps, and full-stack development. Skilled in building serverless applications, containerized microservices, and secure multi-tier cloud networks. Frontend Development Intern with practical experience in React.js and React Native for web and mobile platforms. Strong problem-solving, collaboration, and communication skills. Seeking a full-time role in Cloud Engineering, DevOps, or Software Development to build scalable, reliable systems.

TECHNICAL SKILLS

Languages: C, Python, JavaScript

Web & Mobile Development: HTML, CSS, React.js, React Native

Databases: MySQL, MariaDB, Amazon DynamoDB, Amazon S3, Amazon EFS, Amazon RDS, Amazon Athena

AWS Cloud Services: EC2, Lambda, API Gateway, CloudFront, Route 53, VPC, NAT Gateway, ALB, SSM, Cognito, IAM, CloudTrail

DevOps & Tools: Docker, Kubernetes (Minikube), NGINX, Apache, Linux, Git, VS Code

PROFESSIONAL EXPERIENCE

Frontend Development Intern — MetaQode Technologies Pvt. Ltd.

Jan 2026 – May 2026

Chitradurga, Karnataka

- Built responsive websites using React.js and cross-platform mobile applications for Android and iOS using React Native, expanding user reach across multiple device types.
- Leveraged AI-assisted development tools to accelerate feature delivery, reduce bug counts, and maintain high code-quality standards.
- Designed and implemented reusable UI component libraries, reducing development time for new features through improved code reusability.
- Collaborated with the design team to optimize user data handling and ensure consistent UI/UX across web and mobile platforms.

PROJECTS

Multi-Region Serverless Data Dashboard

AWS Lambda, Cognito, CloudFront, S3

- Built a globally distributed, highly available dashboard using AWS Lambda for serverless compute and Amazon Cognito for secure user authentication.
- Configured Amazon CloudFront CDN for low-latency global content delivery and multi-region S3 replication to ensure data redundancy and high availability.
- Secured internal microservice communication using VPC peering and proxy routing, minimizing public exposure of backend services.

Containerized Student Management System

Docker, Kubernetes, AWS EC2

- Containerized backend services with Docker, orchestrated multi-container deployments via Docker Compose, and managed Kubernetes workloads on AWS EC2 using Minikube with custom YAML manifests.

Secure Multi-Tier Cloud Network Architecture

AWS VPC, ALB, CloudFront, NAT Gateway, SSM, NGINX, Apache, MariaDB

- Architected a production-grade multi-tier VPC with isolated public and private subnets, enforcing least-privilege network access controls.
- Integrated Application Load Balancer, CloudFront, NAT Gateway, and SSM Session Manager for secure, scalable traffic management, with MariaDB as the backend data store.
- Deployed NGINX on a public-facing EC2 instance as a reverse proxy and built an Apache-based registration service with MariaDB for user data storage and verification.

Serverless REST API

AWS Lambda, API Gateway, DynamoDB

- Designed and deployed a fully serverless RESTful API using AWS API Gateway and Lambda with DynamoDB for sub-millisecond NoSQL data access, securing endpoints with IAM-based access control and API Gateway throttling.

EDUCATION

B.E. in Computer Science and Engineering — VTU / SJMIT, Chitradurga

Aug 2023 – Present

CGPA: 7.3

Senior Secondary (Class XII) — Science (PCMB), Chitradurga

June 2022 – May 2023

Percentage: 59.12%
